SUBJECT:

The concept of [REDACTED] being a operational support activity is novel. If the people involved are to work in AND, then I think that a contract should be given to [REDACTED] or to some other company to provide two bodies as indicated. From the background summary, it appears that we intend to increase the number of people involved from 2 to 5. Rather than to get into the business of operating equipment, I would propose that we transfer funds as might be appropriate to do that job outside the facility. The second work order attached simply stretches the camel's nose which the first inserts in the tent flap.
